PROFESSIONAL PROFILE

Bilingual Software Engineer and Digital Transformation Consultant with expertise in Unity 3D/XR development, Full-Stack web applications, and IoT integration. Proven track record in developing immersive VR/AR experiences, multiplayer games, and scalable web solutions. Currently pursuing a Bachelor's in Applied Business Management while leading multiple tech ventures including Zion Hydro Lab (AgriTech AI). Strong background in PHP/Laravel, JavaScript, AWS cloud services, and cross-platform mobile development. Recognized for leadership in cross-functional teams, cultural adaptability through California immersion, and delivering high-performance solutions for international clients.

TECHNICAL SKILLS

- Unity & XR Development: Unity 3D, AR/VR (Oculus/Meta Quest), ARFoundation, Vuforia, Photon PUN/Fusion, WebGL/WebXR, C#, 3D Animation (Blender), Post-Processing Stack
- Full-Stack Development: PHP/Laravel, JavaScript/Web3.js, Java (RESTful APIs), Flutter/Dart, HTML/CSS, MySQL, RESTful APIs, Smart Contracts, Responsive Design
- Cloud & DevOps: AWS (S3, CloudFront), CI/CD Pipelines, GitHub, Version Control, Web Application Security
- Emerging Tech: IoT Integration, AI/ML (Computer Vision), Web3/Blockchain, Antigravity, Cursor, GitHub Copilot

---

PROFESSIONAL EXPERIENCE

Founder & Lead Software Engineer | *Andrés Leonardo Gómez Gil - Autónomo*

📅 Mar 2023 - Present | 🌍 Colombia (Remote)

- Leading development of Zion Hydro Lab, an AI-powered agronomist app for vertical hydroponic cultivation with IoT sensor integration and computer vision for plant health diagnosis
- Developed "Súbale Duitama" mobile app using Flutter/Dart providing local public transit routes
- Built custom CRM application with Flutter and Supabase for productivity automation
- Founded "Sweet Leo Postres en Lata" managing B2C retail operations and B2B supply chain across Colombia
- Managing business operations, digital marketing, customer acquisition, and strategic planning for multiple ventures

---

Digital Transformation Consultant | *Independent Projects*

📅 Jan 2024 - Present | 🌍 Remote

- Supported development of large-scale enterprise web applications and financial/loan systems using Java technologies
- Developed web dashboards for data visualization, integrating front-end components with backend APIs for real-time IoT telemetry
- Deployed front-end applications using AWS S3 and CloudFront, implementing security best practices
- Optimized front-end performance, accessibility, and cross-browser compatibility
- Collaborated with cross-functional teams, participating in code reviews and maintaining high-quality standards

---

Lead Web3 & XR Developer (Freelance) | *Hape Prime & International Projects*

📅 Oct 2023 - Jun 2024 | 🌍 Remote (Mexico/US Clients)

- Architected high-fidelity 3D virtual stores integrated with Smart Contracts for seamless NFT transactions

- Optimized real-time rendering for browser-based and VR experiences using Unity 3D and WebGL
- Developed custom scripts for real-time reflections and baked lighting optimization
- Delivered immersive simulations ensuring cross-platform compatibility (PC/Android/Oculus)
- Applied rigorous security best practices for web applications and secure blockchain transactions

---

VR Unity Developer | *Locktec - Holcim Virtual Training Simulator*

📅 May 2023 - Sep 2023 | 🌍 Nobsa, Boyacá (Hybrid)

- Developed immersive VR training simulator for Holcim's industrial plant using Unity 3D and Oculus Quest
- Created 360° virtual tours with interactive hotspots for equipment familiarization and safety protocols
- Designed specialized training modules for mining operations, working at heights, and risk awareness
- Optimized 3D environments maintaining 72-90 FPS on standalone VR headsets
- Conducted on-site training sessions and provided technical support during field deployment
- Delivered complete project in 4 months, reducing onboarding time by 40%

Full-Stack Unity Developer | *TOQEN S.R.L*

📅 Dec 2022 - Apr 2023 | 🌍 Santa Cruz, Bolivia (Remote)

- Led development of "Neraverse Legendary" - Mario Kart-style multiplayer racing game
- Developed PHP backend services for multiplayer room management, player authentication, and session tracking
- Designed MySQL databases for player profiles, leaderboards, race statistics, and in-app purchases
- Implemented Photon PUN/Fusion for real-time player synchronization and matchmaking
- Engineered comprehensive options framework with real-time sensitivity and audio calibration
- Constructed complex 3D desert environments with optimized asset placement

- Achieved 60 FPS on mid-range devices with <100ms multiplayer latency
- Trained team members on Unity development, networking, and optimization techniques

---

Lead Unity WebGL Developer | *ArtemisVision*

📅 Aug 2021 - Dec 2022 | 🌍 Maryland, USA (Remote)

- Led end-to-end development of multiplayer WebGL and Mixed Reality applications
- Developed backend services using PHP for Web3 authentication and smart contract interactions
- Integrated Smart Contracts with Web3.js for secure NFT transactions (Moralis, Web3Auth)
- Configured AWS S3 and CloudFront for scalable asset storage and content delivery
- Optimized WebGL builds maintaining high frame rates and low draw calls
- Developed interactive 3D showrooms with dynamic multi-camera systems and 360° orbital controls

---

Mixed Reality & WebGL Developer / Project Manager | *SENNOVA - Transportation Technologies Center*

📅 Jun 2021 - Jan 2022 | 🌍 Sogamoso, Colombia

- Developed backend services using PHP and Laravel for web-based XR applications
- Designed MySQL databases for 3D assets metadata, user progress tracking, and analytics
- Built RESTful APIs for Unity WebGL builds and backend communication
- Engineered immersive AR/VR simulations using Unity 3D, ARFoundation, and Vuforia
- Deployed applications using AWS S3 and CloudFront
- Provided technical training to team members on Unity development and 3D animation

---

Lead AR Developer & Researcher | *"Químicamente Locos" Applied Research Group*

📅 Jul 2015 - Dec 2019 | 🌍 Duitama, Boyacá (Hybrid)

- Spearheaded technical development of award-winning EdTech AR initiative over 4.5 years
- Directed 3-person technical sub-team within 10+ member cross-functional research group
- Engineered core mobile application using Unity 3D and Vuforia (image target tracking)
- Led 3D modeling, rigging, and animation using Blender for 8 complex STEM experiments
- Delivered 3 tiered interactive physical booklets (6th-11th grade curriculum)
- Represented research group at national symposiums, presenting AR solutions to diverse audiences

---

Volunteer Representative & Training Lead | *The Church of Jesus Christ of Latter-day Saints*

📅 Aug 2024 - Jan 2026 | 🌍 Santa Ana, California, USA

- Led and mentored groups of up to 10 volunteers in 100% English immersion environment
- Developed native-level English fluency through daily public speaking and teaching
- Managed weekly planning, goal setting, and performance reporting
- Successfully navigated complex interpersonal and community challenges
- Achievement: Recognized for exceptional dedication and top-tier performance

---

EDUCATION

Bachelor of Applied Science in Applied Business Management

BYU-Pathway Worldwide | Jan 2026 - Jul 2028 (In Progress)

- GPA: 4.0/4.0 (97.7% Academic Performance)
- Perfect score (100%) in Mathematics and Logic

- Activities: Student Leadership & Peer Mentoring

Technologist in Mechatronic Automation Design and Integration

SENA (National Learning Service) - Regional Boyacá | Jan 2020 - Jan 2022

- Specialized in industrial process automation and hardware-software integration
- 6-month research and development contract with Applied Research Group
- Status: Approved

High School Diploma (Bachiller)

Colegio Boyacá | 2008 - 2019

CERTIFICATIONS & ACHIEVEMENTS

- EF SET English Certificate: B2 Upper-Intermediate (Reading: C1/C2 Advanced, Listening: B1/B2)
- Perfect Academic Record: 4.0 GPA in Applied Business Management
- Cultural Immersion: 1.5 years in California achieving native-level English fluency

---

LANGUAGES

- English: C1/Native Fluency (Cultural Immersion in California)
- Spanish: Native

CORE COMPETENCIES

- Leadership: Multicultural team management, strategic planning, training & mentoring
- Problem Solving: High-pressure situations, conflict resolution, analytical thinking
- Project Management: Agile methodologies, cross-functional collaboration, code reviews
- Communication: Public speaking, technical documentation, UI/UX collaboration
- Entrepreneurship: Business strategy, digital marketing, customer acquisition,

bootstrapping
